CAREER OBJECTIVE

Computer Science graduate (Data Science specialization) with a strong foundation in SQL, RDBMS, Python, and algorithms, and hands-on experience translating business problems into working technical solutions end-to-end. Looking for an entry-level technology consulting role to apply analytical and problem-solving skills, deliver client-facing solutions, and grow within a mentorship-driven, cross-functional team environment.

EDUCATION

Acropolis Institute of Technology & Research

B.Tech in Computer Science (Data Science); CGPA: 7.2

Indore, M.P.

Nov. 2022 – May 2026

St. Thomas School

Higher Secondary Education (12th); Percentage: 75.41%

2022

TECHNICAL SKILLS

Languages: Python, SQL, C

RDBMS & Data: MySQL, SQLAlchemy, SQL Querying, Database Design, EDA

Core CS: Data Structures & Algorithms (DSA), OOP, DBMS

Frameworks & Tools: Flask, FastAPI, REST APIs, Git, GitHub, Postman

Delivery Skills: Business Requirement Analysis, Technical Solution Design, Debugging, Unit Testing (Pytest), Agile-style Development

Cloud & Big Data: Render.com deployment, Docker basics; familiar with AWS, Azure, GCP concepts

AI & Productivity Tools: GitHub Copilot, SQL generation tools, Generative AI, LLMs, Prompt Engineering

Data Visualization: Excel, Matplotlib, Seaborn, Tableau

EXPERIENCE

Generative AI Training

Trainee

Indore, M.P.

July 2025 – September 2025

- Completed hands-on training in Generative AI, LLM fundamentals, and prompt engineering, collaborating with peers on applied use-case exercises under fixed timelines.
- Evaluated model outputs against requirements and documented findings clearly, building habits around structured, stakeholder-ready write-ups.

PROJECTS

CureNet – Stroke Rehabilitation Planner | Python, Flask, SQLAlchemy, MySQL

- Analyzed the end-user problem and translated it into a technical design, building a full-stack application from database schema (MySQL, SQLAlchemy ORM) through backend logic to deployment.
- Applied Agile-style iterative development with Pytest unit testing and clear documentation; independently debugged deployment issues while shipping to Render.com via Git.

Driver Drowsiness Detection System | Python, OpenCV, Dlib, NumPy

- Converted a real-world safety problem into a working technical solution using computer vision and facial landmark detection.
- Applied algorithmic thinking to engineer and validate EAR/MAR metrics through iterative testing, documenting the pipeline for maintainability.

ACHIEVEMENTS & CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate** – Statistical analysis, hypothesis testing, regression, classification, and data visualization.
- Machine Learning (Supervised) Certificate** – Core ML algorithms including regression, classification, and model evaluation.
- Deloitte Data Analytics Job Simulation (Forage)** – Real-world data analysis tasks translating raw data into business insights.

EXTRACURRICULAR ACTIVITIES

- Consistent practice in Data Structures & Algorithms (LeetCode) to strengthen problem-solving and analytical thinking.
- Self-driven learning in SQL, cloud fundamentals, and applied AI to stay current with modern technology solution delivery.
